

**In the Claims:**

Following entry of the below addition of claims 60 and 61 and before calculation of the filing fee due, cancel all original claims 1-59.

Add new claims 60 and 61:

60. A process of assaying aflatoxin levels in solvent effluent streams comprising:

extracting a sample from a solvent effluent stream;

assaying said sample to determine the level of aflatoxin in the stream; and

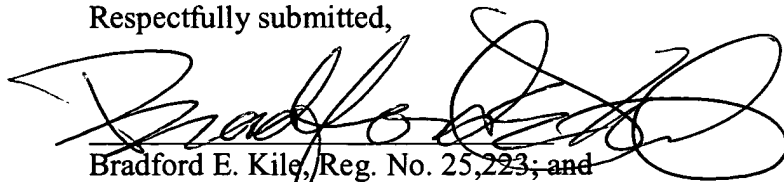

displaying the determined level of aflatoxin in the stream.

61. The process for assaying aflatoxin levels in solvent effluent streams as defined in claim 60

wherein:

a solvent effluent stream is selected from the group consisting of: aqueous solutions, organic-based solvents, ethers, ethanol, methanol, chloroform, dichloromethane, alcohols, ammonia, bleaches, hydrogen peroxide, polyethyleneglycol, amines, methylamines, hydroxides of salts, formalin and ozone.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Bradford E. Kile', is written over a horizontal line.
